

Digital Citizenship Presentations & Workshops

Digital Citizenship 101

Many educators have heard the term "digital citizenship" and may even have a working definition that includes such things as safety measures & password protection. This session helps educators to expand their notion of digital citizenship and realize the power of teaching our kids to be positive digital citizens.

We are ALL Digital Citizens Now! #VirtualLearning

The world has changed and most of us are relying on technology more than ever... to work, to learn, and to stay connected. We really are participants and citizens of a highly digital world! This session serves as an introduction to digital citizenship framed in the current reality of virtual and remote learning.

Digital Citizenship and Virtual Norms #DigitalNorms

Norms are an important component of any successful classroom. In a virtual learning situation, digital norms become critical to a productive, healthy, classroom culture in which students are learning with and through technology. Participants will leave this session with ideas and resources for establishing digital norms.

Creating a Classroom Culture of Postive Digital Citizenship #DigCitCulture

Effective digital leaders don't want to just "check a box" for digital citizenship; they want it to be engrained in the culture of the classroom and school. In this workshop, participants learn about the 6 keys for creating a classroom culture that promotes, models, and guides responsible and healthy technology use.

Under Investigation: Fake News and Beyond #MediaLiteracy

Fake news. It's hard to ignore the prevalence of this term and the societal implications of it. How can we teach kids to critically evaluate media, news, and information they find online? This workshop challenges teachers to identify "fake news" and explore strategies for fostering media and news literacy in their classrooms.

Fostering Social Media Savvy Students #SocialMediaUse

Today's youth have responsibilities that most adults of a certain age are glad we didn't have. Navigating social media in responsible and healthy ways is a tall order, yet our students don't know life without the existence of social media. This workshop presents relatable strategies to help guide students' social media use.

There's No "Oops" Button #DigitalFootprint

What are the consequences of posting anything and everything on the internet? Can students really lose scholarships or college admittance over social media posts? This workshop delves into the concept of privacy and how today's youth attempt to maintain it, as well as strategies to help students consider their "digital footprint" that don't include scare tactics.

Am I OK? #DigitalHealthAndWellness

How does technology use make you feel? This question lies at the heart of digital wellbeing. In this workshop, participants will investigate their own relationship with technology and examine concepts like addiction, social media jealousy, and digital mindfulness. We'll also discuss ways to help our students adopt healthy digital habits.

Is it Stealing or Sharing? #IntellectualProperty #Copyright

Just because technology makes it possibly (and easy!) to copy, paste, use, and share content, doesn't mean that we are allowed to do so! This workshop challenges participants to examine their own practices using and sharing content and presents resources and strategies to integrate these skills into lesson plans teachers are already using.

Becoming a Data Savvy Citizen #DigitalIdentity #DataPrivacy

Some say that data privacy will be the most important issue win the next decade. For many of us, this data collection and privacy stuff is, frankly, a little befudding. This workshop aims to de-mystify data privacy and engage participants in the examination and reflection of their own personal and professional digital privacy practices.
